

KAILAS P K

SOFTWARE ENGINEER

+91 8289853656 | +60 147384551 | kailaspk7pk@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Experienced software development professional with 5 years of expertise in Node.js, JavaScript and TypeScript, along with software implementation and support experience. Skilled in assessing project needs and devising innovative solutions. Proven track record of helping organizations build and troubleshoot high-quality software used by millions. Talented in creative problem-solving and excelling in collaborative environments.

SKILLS

- JavaScript , Typescript, Python
- Node.js, Nest.js, Express.js
- Workflow engine development and software engineering.
- Microservices architecture
- Nest.js microservices with TypeORM and Sequelize
- Version control Git, GitLab
- MySQL, MongoDB, MS SQL
- API design, REST apis, gRPC
- Bitbucket, Jira, Confluence
- Apache Kafka, RabbitMQ
- Hazelcast caching, Fastify
- Backend development
- End-to-End Test with Jest.js

PROFESSIONAL EXPERIENCE

ACCENTURE (MAYBANK)

July 2024 - Present

Software engineer | Kuala Lumpur, Malaysia

Lead backend development for a large-scale project across Southeast Asia, supporting millions of users. My focus includes Kafka for real-time event streaming, ensuring reliable data flow, and MsSQL database management to optimize performance and scalability.

Project Contributions at Maybank

Notification Engine - Real-Time Engagement Platform

- Built a high-throughput notification service using Node.js, Nest.js, Kafka, and AWS to deliver multi-channel messages (SMS, email, push) in real time.
- Designed customer segmentation and campaign management modules to handle millions of participants efficiently.

Workflow Engine - Automation Framework

- Developed a workflow application with Node.js and Nest.js to automate APIs, messaging pipelines, and file-processing jobs.
- Improved operational efficiency and reduced manual intervention through scalable automation.

Salesforce Application (S4U) - Campaign Lead Conversion

- Contributed to applications built with Node.js, Nest.js, and TypeScript to capture potential users and convert them into qualified leads.
- Integrated lead conversion seamlessly with the notification engine for campaign success.

Leads Management System

- Created a centralized system using Node.js, Nest.js, and MsSQL for assigning, tracking, and managing leads across sales teams.
- Enhanced sales productivity through automation, monitoring, and reporting features.

Task Manager – File Ingestion & Processing

- Built a task manager with Node.js and Nest.js to handle ingestion, reading/writing, and secure processing of large customer data files.
- Integrated outputs with lead management and campaign modules to ensure seamless data flow.

Accomplishments in development

- Notification engine development for Maybank's campaign management platform utilizing Kafka and Aws for high-throughput, real-time message processing.
- Designed and implemented cron jobs for streamlined campaign workflows by automating repetitive tasks, reducing manual intervention and enhancing operational efficiency. Additionally developed customer segments to effectively maintain and manage Maybank targeted customers participating in campaigns.
- Implemented ESLint to enforce code quality and consistency, reducing bugs and boosting productivity.

Accomplishments in implementation

- Actively working on creating sequence diagrams and documentation for the APIs, and utilizing JSDoc to generate comprehensive API documentation for client.

FLEXM PRIVATE LIMITED

May 2022 - July 2024

Software engineer | Ernakulam, Kerala, India

Gained extensive experience in developing and maintaining e-payment, fintech applications using technologies such as Node.js, Nest.js, MySQL and Nest.js microservices, alongside TypeORM and gRPC. These applications have serviced over 5000 users worldwide. My expertise also encompasses P2P payments, merchant transactions and cash wallets.

Project Contributions at FlexM

FlexBank - Neo-Banking Platform

- Contributed to the development and enhancement of FlexM's white-label banking-as-a-service product.
- Implemented modular APIs and managed remittance functionality using Node.js, Nest.js, MySQL, and TypeScript to support compliance and scalability.
- Collaborated with senior engineers to deliver secure, client-ready solutions.

6G Mustafa Pay - Remittance & E-Wallet Application

- Supported the end-to-end development and maintenance of a cross-border payment solution enabling users in Singapore to remit money to 20+ countries.
- Handled API integrations, bug fixes, and live server deployments across multiple regions using Node.js, Nest.js, and TypeScript.
- Improved transaction reliability and enhanced user experience.

FlexRemit (Jufu Remittance) - Cross-Border Remittance Platform

- Built and optimized beneficiary management modules for secure multi-currency transfers with Node.js and MySQL.
- Coordinated with client teams to align product delivery with evolving regulatory requirements.

Accomplishments in development

- Managed a 3-member developing team and collaborated with officials to ensure the successful completion of multiple functionalities, creating and utilizing High-level design (HLD).
- Contributed to the deployment of live servers and provided support for server deployments in diverse international locations.
- Managed the remittance functionality within the FlexBank application, alongside responsibilities for development, bug fixing and support for various applications including 6G Mustafa Pay, Connect Canada, PaasPay and Jufu Remittance.

Accomplishments in implementation

- Collaborated with senior developers to implement new features and enhancements for web-based applications using technologies such as HTML, CSS, JavaScript, and Typescript.
 - Worked closely with clients to understand their business needs and translated requirements into technical solutions, delivering projects on time.
 - Assisted in the integration of third-party APIs and services, optimizing system functionality and improving user experience.
-

Junior software developer | Chennai, India

Developed highly interactive web applications utilizing JavaScript, HTML5, Node.js, JSON, MongoDB, git and bitbucket, while integrating Restful APIs and external web services. These applications catered to a user base exceeding 3000 individuals.

Project Contributions at Nextazy**Nextazy Trading Platform - Futures Module**

- Contributed to the development of Nextazy's cryptocurrency trading platform, which offers spot trading, futures, FX, arbitrage, bots, and strategy builders.
- Designed and developed the Futures Trading module, implementing leverage trading, order types, and order-matching logic.
- Utilized Node.js (Express), Redis, RabbitMQ, and microservices architecture to ensure scalability and high performance.

Ravena Wallet - Crypto Holding Wallet

- Built a secure cryptocurrency holding wallet integrated with Binance APIs.
- Developed wallet functionalities including deposit, withdrawal, and asset holding, ensuring seamless integration with the trading platform.
- Implemented best practices for security and transaction reliability, enhancing user trust.
- Provided ongoing support and feature enhancements to align with evolving user needs.

Accomplishments in development

- Possesses extensive understanding of cryptocurrency technologies and demonstrates proficiency in utilizing Binance APIs and platforms.
- Developed a high-quality cryptocurrency trading platform named "Nexfolio" and provided support for existing platforms which have over 3000 users with a 40% increase in platform responsiveness.
- Designed and developed a proficient cryptocurrency holding wallet, referred to as Ravena Wallet.
- Developed a web application utilizing Node.js with the Express framework, employing a microservices architecture and integrating technologies such as Redis and RabbitMQ.
- Developed and are provided support for the establishment of a trading platform for Nextazy's cryptocurrency token, known as N2Coin.

EDUCATION**MASTER OF COMPUTER APPLICATION****2022 Post graduate**

Bharathiar University | Tamil Nadu, India
MCA Postgraduate with good knowledge of subjects.

BACHELOR OF COMPUTER SCIENCE**2020 Graduate**

College of applied science | Kerala, India
B.sc.computer science Graduate with good knowledge of subjects.

LANGUAGES**FIRST LANGUAGE : ENGLISH****OTHER LANGUAGES :**

Tamil - Advanced
Hindi - Intermediate
Malayalam - Proficient

ACHIEVEMENTS

- Google IT support professional certification Issued by Coursera.
- AWS Fundamentals Issued by Coursera.
- Internet of things IETE (workshop).
